Frontmatter

Welcome from the Chairs	iii
ISSTA 2019 Conference Organization	vi
ISSTA 2019 Sponsors and Supporters	ix

Invited Talks

Keynote

Some Challenges for Software Testing Research (Invited Talk Paper)

Nadia Alshahwan, Andrea Ciancone, Mark Harman, Yue Jia, Ke Mao, Alexandru Marginean, Alexander Mols, Hila Peleg, Federica Sarro, and Ilya Zorin — <i>Facebook, UK; University College London, UK; Technion, Israel</i>	1
--	---

ISSTA 2019 Retrospective Impact Paper Award

From Typestate Verification to Interpretable Deep Models (Invited Talk Abstract)

Eran Yahav, Stephen J. Fink, Nurit Dor, G. Ramalingam, and Emmanuel Geay — <i>Technion, Israel; Facebook, USA; Kayhut, Israel; Microsoft Research, USA; Wayfair, USA</i>	4
--	---

ISSTA 2019 Impact Paper Award

Theory and Practice of String Solvers (Invited Talk Abstract)

Adam Kiezun, Philip J. Guo, Pieter Hooimeijer, Michael D. Ernst, and Vijay Ganesh — <i>Amazon, USA; University of California at San Diego, USA; Facebook, USA; University of Washington, USA; University of Waterloo, Canada</i>	6
--	---

Main Research

Program Repair

Crash-Avoiding Program Repair

Xiang Gao, Sergey Mechtaev, and Abhik Roychoudhury — <i>National University of Singapore, Singapore; University College London, UK</i>	8
--	---

Practical Program Repair via Bytecode Mutation

Ali Ghanbari, Samuel Benton, and Lingming Zhang — <i>University of Texas at Dallas, USA</i>	19
---	----

TBar: Revisiting Template-Based Automated Program Repair

Kui Liu, Anil Koyuncu, Dongsun Kim, and Tegawendé F. Bissyandé — <i>University of Luxembourg, Luxembourg</i>	31
--	----

History-Driven Build Failure Fixing: How Far Are We?

Yiling Lou, Junjie Chen, Lingming Zhang, Dan Hao, and Lu Zhang — <i>Peking University, China; University of Texas at Dallas, USA</i>	43
--	----

Mobile App Testing

LiBID: Reliable Identification of Obfuscated Third-Party Android Libraries

Jiexin Zhang, Alastair R. Beresford, and Stephan A. Kollmann — <i>University of Cambridge, UK</i>	55
---	----

QADroid: Regression Event Selection for Android Applications

Aman Sharma and Rupesh Nasre — <i>IIT Madras, India</i>	66
---	----

Mining Android Crash Fixes in the Absence of Issue- and Change-Tracking Systems

Pingfan Kong, Li Li, Jun Gao, Tegawendé F. Bissyandé, and Jacques Klein — <i>University of Luxembourg, Luxembourg; Monash University, Australia</i>	78
---	----

Sara: Self-Replay Augmented Record and Replay for Android in Industrial Cases

Jiaqi Guo, Shuyue Li, Jian-Guang Lou, Zijiang Yang, and Ting Liu — <i>Xi'an Jiaotong University, China; Microsoft Research, China; Western Michigan University, USA</i>	90
---	----

Regression Testing

Root Causing Flaky Tests in a Large-Scale Industrial Setting

Wing Lam, Patrice Godefroid, Suman Nath, Anirudh Santhiar, and Suresh Thummalapenta — *University of Illinois at Urbana-Champaign, USA; Microsoft, USA* 101

Mitigating the Effects of Flaky Tests on Mutation Testing

August Shi, Jonathan Bell, and Darko Marinov — *University of Illinois at Urbana-Champaign, USA; George Mason University, USA* 112

Assessing the State and Improving the Art of Parallel Testing for C

Oliver Schwahn, Nicolas Coppik, Stefan Winter, and Neeraj Suri — *TU Darmstadt, Germany* 123

Failure Clustering without Coverage

Mojdeh Golagha, Constantin Lehnhoff, Alexander Pretschner, and Hermann Ilmberger — *TU Munich, Germany; BMW, Germany* 134

Testing and Machine Learning

DeepHunter: A Coverage-Guided Fuzz Testing Framework for Deep Neural Networks

Xiaofei Xie, Lei Ma, Felix Juefei-Xu, Minhui Xue, Hongxu Chen, Yang Liu, Jianjun Zhao, Bo Li, Jianxiong Yin, and Simon See — *Nanyang Technological University, Singapore; Kyushu University, Japan; Carnegie Mellon University, USA; University of Adelaide, Australia; Zhejiang Sci-Tech University, China; University of Illinois at Urbana-Champaign, USA; NVIDIA AI Tech Centre, Singapore* 146

Search-Based Test and Improvement of Machine-Learning-Based Anomaly Detection Systems

Maxime Cordy, Steve Muller, Mike Papadakis, and Yves Le Traon — *University of Luxembourg, Luxembourg* 158

DeepFL: Integrating Multiple Fault Diagnosis Dimensions for Deep Fault Localization

Xia Li, Wei Li, Yuqun Zhang, and Lingming Zhang — *University of Texas at Dallas, USA; Southern University of Science and Technology, China* 169

Codebase-Adaptive Detection of Security-Relevant Methods

Goran Piskachev, Lisa Nguyen Quang Do, and Eric Bodden — *Fraunhofer IEM, Germany; University of Paderborn, Germany* 181

APIs and Symbolic Execution

Effective and Efficient API Misuse Detection via Exception Propagation and Search-Based Testing

Maria Kechagia, Xavier Devroey, Annibale Panichella, Georgios Gousios, and Arie van Deursen — *University College London, UK; Delft University of Technology, Netherlands* 192

Automated API-Usage Update for Android Apps

Mattia Fazzini, Qi Xin, and Alessandro Orso — *Georgia Institute of Technology, USA* 204

A Large-Scale Study of Application Incompatibilities in Android

Haipeng Cai, Ziyi Zhang, Li Li, and Xiaoqin Fu — *Washington State University, USA; Monash University, Australia* 216

Deferred Concretization in Symbolic Execution via Fuzzing

Awanish Pandey, Phani Raj Goutham Kotcharlakota, and Subhajit Roy — *IIT Kanpur, India* 228

Static Analysis and Debugging

Differentially Testing Soundness and Precision of Program Analyzers

Christian Klinger, Maria Christakis, and Valentin Wüstholtz — *Saarland University, Germany; MPI-SWS, Germany; ConsenSys Diligence, Germany* 239

Judge: Identifying, Understanding, and Evaluating Sources of Unsoundness in Call Graphs

Michael Reif, Florian Kübler, Michael Eichberg, Dominik Helm, and Mira Mezini — *TU Darmstadt, Germany* 251

Adlib: Analyzer for Mobile Ad Platform Libraries

Sungho Lee and Sukyoung Ryu — *KAIST, South Korea* 262

Interactive Metamorphic Testing of Debuggers

Sandro Tolksdorf, Daniel Lehmann, and Michael Pradel — *TU Darmstadt, Germany* 273

Testing GUIs and Cars

TestMig: Migrating GUI Test Cases from iOS to Android

Xue Qin, Hao Zhong, and Xiaoyin Wang — *University of Texas at San Antonio, USA; Shanghai Jiao Tong University, China* 284

Learning User Interface Element Interactions

Christian Degott, Nataniel P. Borges Jr., and Andreas Zeller — *CISPA, Germany* 296

Improving Random GUI Testing with Image-Based Widget Detection

Thomas D. White, Gordon Fraser, and Guy J. Brown — *University of Sheffield, UK; University of Passau, Germany* 307

Automatically Testing Self-Driving Cars with Search-Based Procedural Content Generation

Alessio Gambi, Marc Mueller, and Gordon Fraser — *University of Passau, Germany; BeamNG, Germany* 318

Potpourri

Semantic Fuzzing with Zest

Rohan Padhye, Caroline Lemieux, Koushik Sen, Mike Papadakis, and Yves Le Traon — *University of California at Berkeley, USA; University of Luxembourg, Luxembourg* 329

Detecting Memory Errors at Runtime with Source-Level Instrumentation

Zhe Chen, Junqi Yan, Shuanglong Kan, Ju Qian, and Jingling Xue — *Nanjing University of Aeronautics and Astronautics, China; UNSW, Australia* 341

Optimal Context-Sensitive Dynamic Partial Order Reduction with Observers

Elvira Albert, Maria Garcia de la Banda, Miguel Gómez-Zamalloa, Miguel Isabel, and Peter J. Stuckey — *Complutense University of Madrid, Spain; Monash University, Australia* 352

Exploiting the Laws of Order in Smart Contracts

Aashish Kolluri, Ivica Nikolic, Ilya Sergey, Aquinas Hobor, and Prateek Saxena — *National University of Singapore, Singapore; Yale-NUS College, Singapore* 363

Tool Demonstration

Go-Clone: Graph-Embedding Based Clone Detector for Golang

Cong Wang, Jian Gao, Yu Jiang, Zhenchang Xing, Huafeng Zhang, Weiliang Yin, Ming Gu, and Jianguang Sun — *Tsinghua University, China; Australian National University, Australia; Huawei Technologies, China* 374

VFQL: Combinational Static Analysis as Query Language

Guang Chen, Yuxing Wang, Min Zhou, and Jianguang Sun — *Tsinghua University, China* 378

VBSAC: A Value-Based Static Analyzer for C

Chi Li, Min Zhou, Zuxing Gu, Guang Chen, Yuxing Wang, Jiecheng Wu, and Ming Gu — *Tsinghua University, China* 382

SAFEVM: A Safety Verifier for Ethereum Smart Contracts

Elvira Albert, Jesús Correias, Pablo Gordillo, Guillermo Román-Díez, and Albert Rubio — *Complutense University of Madrid, Spain; Universidad Politécnica de Madrid, Spain* 386

CoCoTest: Collaborative Crowdsourced Testing for Android Applications

Haoyu Li, Chunrong Fang, Zhibin Wei, and Zhenyu Chen — *Nanjing University, China* 390

Androlic: An Extensible Flow, Context, Object, Field, and Path-Sensitive Static Analysis Framework for Android

Linjie Pan, Baoquan Cui, Jiwei Yan, Xutong Ma, Jun Yan, and Jian Zhang — *Institute of Software at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Peking University, China* 394

JQF: Coverage-Guided Property-Based Testing in Java

Rohan Padhye, Caroline Lemieux, and Koushik Sen — *University of California at Berkeley, USA* 398

Ukwikora: Continuous Inspection for Keyword-Driven Testing

Renaud Rwemalika, Marinos Kintis, Mike Papadakis, Yves Le Traon, and Pierre Lorrach — *University of Luxembourg, Luxembourg; BGL BNP Paribas, Luxembourg* 402

CTRAS: A Tool for Aggregating and Summarizing Crowdsourced Test Reports

Yuying Li, Rui Hao, Yang Feng, James A. Jones, Xiaofang Zhang, and Zhenyu Chen — *Nanjing University, China; University of California at Irvine, USA; Soochow University, China; Mootest, China* 406

Doctoral Symposium

Continuous Software Performance Assessment: Detecting Performance Problems of Software Libraries on Every Build

Christoph Laaber — *University of Zurich, Switzerland* 410

Mining Constraints for Grammar Fuzzing

Michaël Mera — *CISPA, Germany* 415

A New Dimension of Test Quality: Assessing and Generating Higher Quality Unit Test Cases

Giovanni Grano — *University of Zurich, Switzerland* 419

A Cost-Effective Strategy for Software Vulnerability Prediction Based on Bellwether Analysis

Patrick Kwaku Kudjo and Jinfu Chen — *Jiangsu University, China* 424

Identifying Error Code Misuses in Complex System

Wensheng Tang — *Hong Kong University of Science and Technology, China* 428

Conditional Dynamic Partial Order Reduction and Optimality Results

Miguel Isabel — *Complutense University of Madrid, Spain* 433

Towards Scalable Defense of Information Flow Security for Distributed Systems
Xiaoqin Fu — *Washington State University, USA* 438

On the Correctness of GPU Programs
Chao Peng — *University of Edinburgh, UK* 443

JNI Program Analysis with Automatically Extracted C Semantic Summary
Sungho Lee — *KAIST, South Korea* 448

Author Index 452
